

# Device Provisioning

## Gigaset Cordless IP Phones - Manual Configuration

### Gigaset Cordless IP Phones - Manual Configuration

This KB is limited to the Gigaset family of cordless (DECT) handsets.

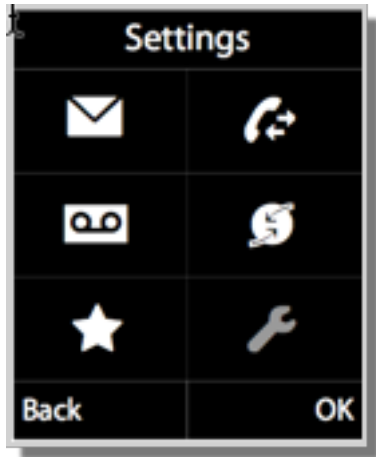

#### Configuring the phone via the Web configurator

We recommend using the base stations web user interface to configure each handset.

- Establish the telephone's current IP address on the handset
- Control button on right side of handset
- Settings (spanner icon)
- Registration

# Device Provisioning

- Enter http:// and the telephone's current IP address (for example: http://192.168.2.2) into the address field of the Web browser.
- Press the return key.
- A connection is established to the phone's Web configurator.

On the Web UI follow the steps below

# Device Provisioning

- Login default password: 0000
- Select: **Settings** | **Telephony** | **Connections**
- Select Edit the required extension
- Personal Provider Data
  - Authentication Name: <your phone number> (e.g. 442034567890)
  - Authentication Password: <your password>
  - User name: <your phone number> (e.g. 442034567890)
- General Provider Data
  - Domain: phone.tel2.co.uk
  - Proxy server Port: 5060
  - Register server: phone.tel2.co.uk
  - Refresh Registration: 180 seconds
  - Save settings: **SET**

# Device Provisioning

The screenshot shows a '1. SIP Connection' configuration form. It includes sections for 'Connection Name or Number', 'Auto Configuration', 'Personal Provider Data', and 'General Provider Data'. Two red boxes with numbers highlight specific fields: box 4 highlights the 'Authentication Name' and 'Username' fields, both containing '\$1280316624'; box 5 highlights the 'Domain' field containing 'call.sipcity.com.au' and the 'Registrar server' field also containing 'call.sipcity.com.au'. Other visible fields include 'Connection Name or Number' (02 8031 6624), 'Auto Configuration Code', 'Provider' (Other Provider), 'Authentication password' (masked), 'Display name' (Ext 624), 'Proxy server address', 'Proxy server port' (5060), 'Registrar server port' (5060), 'Registration refresh time' (180 sec), and 'STUN enabled' (Yes).

**NB** – the Gigaset are typically slow to acknowledge the handsets registration and can take 30 seconds to change status to **Registered**.
